---

SUBJECT:

Inclusion of Calcium Carbide under the  
Lysso Petroleum Regulation.

---

S 4077 of 1932

To

Compiler. M. G.

*Notified* Ni

General and Revenue  
Secretariat

Gest. File No. 26\*

of 1931

Serial  
No.

From the Chief Inspector of Mines No. 470  
d. 23. 9. 31. States, in connection with an ex-  
plosives accident that occurred at Katheru  
village, Beccingpet Taluk, that the opinion  
of the Director of I & E that Calcium Carbide  
does not come under the operation of the Petrole-  
um Regulation is not correct and requests  
for reasons stated that this question of in-ter-  
preting the administration of the Petroleum  
Regulation & Rules to the Explosives Section  
as in British India & other countries  
of his Dept. may be reconsidered.

The previous file on the subject (Gest. 100-28)  
is put up for perusal. Copies of the <sup>the</sup> Petroleum  
Regulation & Rules, The Explosives Regulation  
Rules thereunder & The Indian Petroleum Act  
1899 are also put up for perusal. But the  
Report of the Chief Inspector of Explosives in  
India for 1918 repd to on page 2 of <sup>his</sup> letter  
is stated to be not available in the G. R. S.  
Library, the Chief Inspector will, if approved,  
be requested to forward a copy of the report  
for perusal.

Let the order with a draft.

1234  
1419

Geol. File No.

26

of 1931

General and Revenue  
Secretariat

To The Chief Inspector of Mines, Bangalore, K.F. 2  
Requests him to forward for reference a  
copy of the <sup>Annual</sup> Report of the Chief Inspector of  
Explosives in India for the year ending 31st  
March 1918 ref'd to in para 2 of his letter.  
From the same Officer. No 534 d. 5.10.31. 3  
Forwards the Report of the Chief Inspector of  
Explosives in India for reference and return  
when done with.

Under for orders with the Mysore  
Regulations & Rules & the Indian Petroleum Act  
and the Report of the Chief Inspector of Explosives  
in India now received.

~~NOTE~~ The previous history of the case is  
referred contained in Geol. 100-28 (notes) which  
is summarised below.

The work of inspection and licensing of petro-  
leum & petroleum installations in the State  
had been entrusted to the Inspector of Ex-  
plosives prior to the abolition of the separate  
Explosives Branch of the Mines Dept in June 1922  
In G.O. No. 946-66/1922. Geol. 88-21-1 d.  
27.6.22 on the recommendation of the Special  
Finance Committee the separate Explosives Section  
was ordered to be abolished and the work done  
by the Inspector of Explosives was ordered to be  
looked after by the Chief Inspector of Mines & Ex-  
plosives. In July 1924 Mr. R. Bocquet, Chief  
Inspector of Mines, represented that he was not  
vested with authority under the Mysore Petroleum  
Regulations & Rules to administer the same

4901. File No. 26

of 193

Serial  
No.

and that it was not fair on just to saddle the Mines Dept with this extra volume of work & responsibility involved by the administration of the Petroleum Regulation & Rules which by itself would require the services of a full-time officer & staff, and in another letter d. 5.8.24 ~~and~~ <sup>he</sup> requested that the Govt might be pleased to excuse the Chief Inspector <sup>him</sup> of Mines from carrying out the above work until definite orders had been passed in the matter.

On receipt of a further communication d. 26.8.24 from the Mr. Broquet stating that he would take up the work if Govt paid him an additional pay of Rs. 500 to 600, a month, Govt passed orders transferring this work to the Director of I & C (vide G.O. No. 9.4.5210-76 / J. 2-24-4 d. 30.12.29 in view of the fact that the Chief Inspector has no District officers under him. When in April 1929 he requested that the <sup>above</sup> work might be <sup>retransferred</sup> to his Dept as is the case in <sup>England &</sup> British India, ~~but~~ he was informed that Govt did not consider it necessary to alter the existing system at present. He made requests - a necessity.

Kind office is invited  
to Serials 4, 5 & 6, 10, 11 & 12  
of the office memo in File No 100-28  
of 1928 referred herewith for kind perusal.  
The matter has been finally disposed of  
and there appears to be no reason  
to reconsider the order passed.

19/10/31

Secy)

The undersigned Before dealing with the  
Question of transfer of control of the admin. of the  
Police Reg. he has to deal with the specific  
case brought to notice, viz that of Police No. 12.  
Some authority should be made responsible.  
Who is this to be? Please examine & put up.

mx  
25/10/31

Kind attention is invited to Chapter II,  
Classification of Explosives<sup>given</sup> of the Rules un-  
der the Mysore Explosives Regulation II of  
1888 wherein 7 classes of explosives are men-  
tioned. The above substance, viz, Calci-  
um Cyanide, does not come under any of  
the seven sub-divisions. It is however  
mentioned in a foot-note under Section 22.

in British India it was brought under  
the Petroleum Act so far back as 1899

But so long as the substance has  
not been specifically brought under  
the Mysore Petroleum Regn. the ~~Dept of~~  
Sec of Stc. can not be reasonably  
be expected to investigate such cases.

On the other hand, the definition  
of the word "Explosive" in the  
Mysore Explosives Regn. II of 1888  
is so wide + comprehensive that  
any substance by virtue of its  
explosive character <sup>properties</sup> can be construed  
to fall under the category of Explosives.

In this particular case, the explosion  
was caused by the remnant of  
Calcium Carbide in the 8 mm. dia.  
consequently the substance is an  
explosive as defined in Sec 3(I) of the Exple Regn.  
and so the Chief Inspector of Explosives  
appears to be the proper authority for  
investigating the case. If needed the  
Law Secy may also be consulted.

R.D.

11.11.31 The Ch. Insp<sup>r</sup> of Mines  
appears to be the proper officer to  
have investigated the case. He says  
"Calcium Carbide" does not come under  
the Mysore Explosives Regulation - The definition  
of the term "Explosive" as given in Sec (B) (1)

of the Explosives Regulations read with  
Chapter II of the Rules under the said  
Regulations cannot but bring Calcutta  
Carbide & substances of the kind under  
the category of "Explosives". If approved  
the Ch. Insp<sup>t</sup> will be requested to take  
necessary action in this case.

*[Signature]*  
11/11/11

Dev. Secy)

Since specific provision has not been made  
to bring Cal. Carbide under one or the other of the  
two regulations mentioned, the best way in this  
case would be to find out for what purpose  
the Cal. Carbide had been obtained in drums  
if for mining, then, the Chief Insp<sup>t</sup> of  
mines should deal with the case. Otherwise  
if it has nothing to do with the mines, the  
Ch Insp<sup>t</sup> may deal with the case.

Apart from the case in question, I think  
it is necessary to define the place of Cal.  
Carbide in either the Explosives Regn or  
the Petroleum Regn. I think it should come  
under the Pet. Regn. as in B. & L. India.

As regards the transfer of control of the admin. of the  
Regn, the matter has been fully gone into in  
the paper file below and I agree with the assn.  
But there is no reason to think of a change  
now.

This case also since it is propose to include this substance under Pet Reg<sup>n</sup>. Necessary action to include it may also be taken early

Jpr  
18/11/31

sur. with a draft order & notification. The notification has been put up on the lines of the Govt of India Notification of 4<sup>th</sup> Jan'y 1907 used to in the foot-note to Section 22 of the Indian Petroleum Act, of 1899.

M.V. Red  
3.12.31. Draft order is being for approval. As regards the notification, the law dept. will, if approved, be consulted before issue.

11/12/31  
8  
57/12/31  
13  
7/12/31

The footnote printed in the Indian Petroleum Act, 1899 at page 14, says that the provisions of ss: 5, 8 to 17, 19, 23 & 24 have been applied under Sec 22 to carbide of calcium. But the Govt of India notification printed at page 15 of Gazette of India 1907 Pt I, applies

Serial

Only the provisions of sections 8 to 15, 17, 18, 23 & 24 of the Petroleum Act. Sections 5 and 16 of the Act dealing with dangerous petroleum have not been applied to calcium carbide & I think, for obvious reasons. The footnote referred to, I fear, is not correct. For if sec 16 applies as is mentioned therein, sec 7 ought to apply as otherwise a penalty would be imposed for an act which is itself not a duty imposed by the statute. I think it is safe to follow the notification itself, in such circumstances & not the footnote. Since there is no section in our Regn corresponding to sec 9 of the Indian Act & consequently ss 10 to 15 of the Act correspond to ss 9 to 14 of the Regn, the notification has to apply the provisions of sections 8 to 14, 16, 17, 22 and 23 of the Regulation to the substance now under consideration. The notification itself is to issue in exercise of powers conferred by sec 21 of the Regn & not sec 22 as per draft. Perhaps I have indicated the necessary corrections in the draft.

(Rev Br)

Draft Notification as modified by the Law Dept is held for approval.

(Rev. Secy)

For approval.

8/12/31

Should not they be first issued as a draft for public criticism? Should be regulated in a separate Rule? Carbide Rule only 18/12/31

The file will be appd be sent to the Law  
Dept for, perusal of remarks on the 1st  
Memorandum, given on the last page.

MY.

21/12/31.

to Law Dept  
Wm. Giff  
Ed.

Under sec 23 of the Petroleum Regn,

it is only with respect to rules that  
previous publication is necessary. The  
Regn does not require such publication  
in case of a notification under sec 21.

The quantities of carbide pr.  
imposes ~~propos~~ of section 10, it may be fixed  
in the notification itself and no separ  
rule is necessary for this - But sec 10  
itself contemplates a license to be gran  
& the conditions of such license can be  
prescribed only by rules under sec 8  
It is perhaps on this account that the  
Govt of India have ~~said so~~ referred to  
the rules in the notification, for fixing  
the quantity of carbide.

Serial  
No.

1469

The draft notification is, I think, all right and it may be approved. Before, however, issuing it, it is as well to refer it to the Director of Industries & Commerce. He will have to administer the provisions of the Petroleum Regulation in so far as they will be applied to carbide of calcium. This reference to him at this stage is necessary for another reason: he is under the impression that carbide of calcium does not come under the Petroleum Regulation. Following the British Indian practice, we may deal with this material under the Petroleum Law.

As soon as this notification is issued, it will be necessary to notify the rules ~~necessary~~ ~~sary~~ for dealing with all matters relating to carbide of calcium. The Director may be requested to send draft of the rules required for this purpose.

As regards the general ~~x~~ question of ~~the~~ transfer to the Department of Mines of the responsibility for the administration of the Petroleum Regulation raised by the Chief Inspector of Mines, he may be asked to state whether any additional establishment is necessary for undertaking this work. It is no doubt desirable to concentrate in the hands of one Department the work relating to explosives of all kinds. If, however, this arrangement involves the entertainment of any additional establishment, it cannot be considered now.

Encl:— one.

GEN. & REV. SECRETARIA.  
4 SEP

C. E. SURYANARAYANA RAU, Esq., Mem. A.I.M.E., &C.,  
Chief Inspector of Mines in Mysore.

To

B. T. Kesaviengar, Esq., B.A.,  
Secretary to the Government of His Highness  
the Maharaja of Mysore, Development Department.,  
B A N G A L O R E.

Sir,

I have the honour to state that an accident occurred at Kothur village, Bowringpet Taluk, resulting in injuries to a person by name Gopala Naidu through the explosion of remnant of Calcium Carbide contained in <sup>a</sup> drum when the same was being cleaned with water and a report of the accident was sent to this Department by the Kolar Gold Field Police. As Calcium Carbide comes under the operation of the Mysore Petroleum Regulation and not under the Mysore Explosives Regulation, the report in question was transferred to the Director of Industries and Commerce in Mysore for necessary action, since the administrative control of the former Regulation <sup>is</sup> vested in him. The Director states that Calcium Carbide does not come under 'Petroleum' as defined in Section 2, clause (a) of the Mysore Petroleum Regulation and accordingly has addressed the Special Superintendent of Police, K.G.F. - copy of his letter enclosed herewith - to take such action as he deems necessary. Thus the accident in question is neither dealt with by this Department nor the Industries Department.

In this connection, I beg to submit that the Mysore Petroleum Regulation provides not only for the control of the importation, possession and sale of petroleum but 'other substances' as well - vide Preamble of Regulation of 1923. The Mysore Petroleum Regulation and Rules are modelled on the British Indian Act and Rules. In the Indian

Petroleum

Petroleum Act VIII of 1899 Carbide of Calcium is specifically brought under that act - vide Section 22 and foot note attached - but acetylene which is a product of calcium carbide is declared an explosive under the Explosives Act, - vide page 5 of the Report of the Chief Inspector of Explosives in India for the year ended 31st March 1918.

From the above, it will be seen that the contention of the Director that Calcium Carbide does not come under the operation of Petroleum Regulation is not correct.

In this connection, I think it desirable to bring to the notice of Government once again the following points in the matter of administration of the Mysore Petroleum Regulation and Rules thereunder and I am also to invite your kind reference to correspondence resting with your letter No.D.13189/Geol.100-28-2 dated 12th June 1929:-

In British India, in the United Kingdom and elsewhere the administrative duties under the Explosives and Petroleum Acts are delegated to the officers of Explosives Department, the technical provisions re: issue of licenses, etc., under the Rules framed under the above Acts being similar and all items of work connected therewith viz: inspection of Explosives Magazines, Petroleum Installations, testing of Lightning Conductors attached to them, enquiries into accidents (both explosives and Petroleum) are all performed by the same Department and particulars of work done are incorporated and published in one and the same annual report.

The details of work to be done under the Petroleum Regulation and Rules being analagous to those performed under the Explosives Rules, these duties can with advantage be combined and brought into line and looked after by the same agency instead of distributing the work among three Departments - Department of Industries, & Commerce, the Electrical Department ( to test lightning conductor's only) and the Department of

As the administration of Petroleum Regulation and Rules pertains to the Explosives section of this Department, it is highly desirable and necessary that the administrative control under it should be re-transferred to this Department in common with the practice obtaining in British India and other countries.

For the aforesaid reasons I request that Government may be pleased to re-consider the question of transfer of the administration of the Petroleum Regulation and Rules to this Department.

Early orders of Government are solicited in the matter.

I have the honour to be,

Sir,

Your most obedient servant,

  
CHIEF INSPECTOR OF MINES

 IN MYSORE.

Letter No.C2-Genl.3515/31-32 dated 18/9/1931 from the Director of Industries & Commerce in Mysore, Bangalore, to the Special Superintendent of Police, Kolar Gold Field, Champion Reef, copy of which was forwarded with former's Memo No. nil of the same date to the Chief Inspector of Mines in Mysore, Kolar Gold Field, Oorgaum.

With reference to your letter No.G.C.191/31-32 dated 3/4-9-31 regarding the action to be taken under the Mysore Petroleum Regulation in connection with the injuries sustained by Gopala Naidu of Kothur village while cleaning a carbide drum with water, I have the honour to state that carbide does not come under "Petroleum" as defined in section 2, Clause (a) of the Mysore Petroleum Regulation. I therefore suggest that such action as you may deem to be necessary in the usual course may kindly be taken in the matter. I also request that arrangements may be made to get back from here the empty drum in question.

B a n g a l o r e.

Sir,

With reference to your letter No.D.4227 dated 23rd February 1932 enquiring whether any additional establishment is necessary for undertaking the work of administration of the Mysore Petroleum Regulation and Rules thereunder by this Department, I have the honour to state that no additional establishment is necessary as the Government have already sanctioned in their order No. D.3327-8/Geol. 38-31-2 dated 31st December 1931 the continuance of Mr. R. S. Batni as a Probationer, who can be absorbed in this connection in due course. This arrangement will not involve any additional expenditure at present.

I have the honour to be,

Sir,

Your most obedient servant,

C. E. Suryanarayana Rau  
Chief Inspector of Mines  
in Mysore.
